TODAY'S CARE	PCMH CARE
My patients are those who make appointments to see me	Our patients are the population community
Care is determined by today's problem and time available today	Care is determined by a proactive plan to meet patient needs with or without visits
Care varies by scheduled time and memory or skill of the doctor	Care is standardized according to evidence-based guidelines
I know I deliver high quality care because I'm well trained	We measure our quality and make rapid changes to improve it
Patients are responsible for coordinating their own care	A prepared team of professionals coordinates all patients' care
It's up to the patient to tell us what happened to them	We track tests & consultations, and follow-up after ED & hospital
Clinic operations center on meeting the doctor's needs	A multidisciplinary team works at the top of our licenses to serve patients

Smarter Healthcare

36.3%	Drop in hospital days
32.2%	Drop in ER use
12.8%	Increase Chronic Medication use
-15.6%	Total cost
10.5%	Drop Inpatient specialty care costs
18.9%	Ancillary costs down
15.0%	Outpatient specialty down
Outcomes of Implementing Patient Centered Medical Home Interventions: A Review of the Evidence from Prospective Evaluation Studies in the US - PCPCC Oct 2012

PCMH Lower Costs
Aug 5th 2013 Pennsylvania

- 44% reduction in hospital costs

- 21% reduction in overall medical costs.

- 160 PCMH practices Pennsylvania from 2008 to 12

- Number of patients with poorly controlled diabetes declined by 45%.

Jeffrey Bendix modernmedicine.com/

PCMH Michigan – Aug 11th 2013

- 19.1% lower rate of adult hospitalization.
- 8.8% lower rate of adult ER visits.
- 17.7% lower rate ER visits (children under age 17)
- 7.3% lower rate of adult high-tech radiology usage

VS other non-PCMH designated primary care physicians.

3,017 Physicians

. Medical home physicians help patients avoid ERs and admissions by evening hour appointments, weekend and same-day appointments

WellPoint PCMH Preliminary Year 2 Highlights In Sept Issue Health affairs 2012

Colorado

NEW HAMPSHIRE

New York

- **18% *decrease* in acute IP admissions/1000, compared to 18% *increase* in control group**

- **15% *decrease* in total ER visits/1000, compared to 4% *increase* in control group**

- **Specialty visits/1000 remained around flat compared to 10% *increase* in control group**

- **Overall Return on Investment estimates ranged between 2.5:1 and 4.5:1**

- 1/3 less cardiac intervention needed
- 60% less complication Diabetes

Trajectory to Value Based Purchasing:
Achieving Real Care Coordination and
Outcome Measurement

HIT Infrastructure: EHRs and Connectivity

Primary Care Capacity: Patient Centered Medical Home

Operational Care Coordination: Embedded RN Coordinator and Health Plan Care Coordination $
Value/Outcome Measurement: Reporting of Quality, Utilization and Patient Satisfaction Measures

Value-Based Purchasing: Reimbursement Tied to Performance on Value (quality, appropriate utilization and patient satisfaction)
Achieve Supportive Base for ACOs and Bundled Payments with Outcome Measurement and Health Plan Involvement

Note: Information as of October 18, 2012. Program accessibility to National Account members varies by market.
Geisinger's Proven Health Navigator Model serving Medicare Patients in rural Pennsylvania reported 7.1% savings over expected costs from 2006-2010 with an ROI of 1.7

• **Genesee Health Plan** in Flint, Michigan, reported PCMH services helped reduce ER visits by 51% between 2004 and 2007 and reduced hospital admissions by 15% between 2006 and 2007

• **WellPoint's** PCMH model in New York yielded risk-adjusted total PMPM costs that were 14.5% lower for adults and 8.6% lower for children enrolled in the medical home

• **CareFirst Blue Cross Blue Shield** of Maryland yielded an estimated 15% pmpm savings in the first year and $98 million in savings over two years

• **Group Health of Washington** reported overall cost savings of $17 PMPM including 29% fewer ER visits and 11% reduction in hospitalizations for ambulatory sensitive conditions

• **Oklahoma Medicaid** reported $29 PMPM savings

• **HealthPartners** in Minnesota reported 39% reduction in ER visits, 24% fewer hospitalizations, 40% reduction in readmission rates and 20% reduction in inpatient costs

Why the Medical Home Works: A Framework
www.pcpcc.net

| Feature	Definition	Sample Strategies	Potential Impacts
Patient-Centered	Supports patients in learning to manage and organize their own care at the level they choose, and ensures that patients and families are fully informed partners in health system transformation at the practice, community, and policy levels.	• Additional staff positions to help patients navigate the system and fulfill care plans (e.g., care coodinators, patient navigators, social workers) • Compassionate and culturally sensitive care • Strong, trusting relationships with physicians and care team, and open communication about decisions and health status	Patients are more likely to seek the right care, in the right place, and at the right time.
Comprehensive	A team of care providers is wholly accountable for a patient's physical and mental health care needs, including prevention and wellness, acute care, and chronic care.	• Care team focuses on 'whole person' and population health • Primary care is co-located with oral, vision, OB/GYN, pharmacy and other services • Special attention paid to chronic disease and complex patients	Patients are less likely to seek care from the emergency room or hospital, and delay or leave conditions untreated
Coordinated	Ensures that care is organized across all elements of the broader health care system, including specialty care, hospitals, home health care, and community services and supports.	• Care is documented and communicated effectively across providers and institutions, including patients, primary care, specialists, hospitals, home health, etc. • Communication and connectedness is enhanced by health information technology	Providers are less likely to order duplicate tests, labs, or procedures
Accessible	Delivers consumer-friendly services with shorter wait-times, extended hours, 24/7 electronic or telephone access, and strong communication through health IT innovations.	• Implement more efficient appointment systems that offer same-day or 24/7 access to care team • Use of e-communications and telemedicine to provide alternatives for face-to-face visits and allow for after hours care.	Better management of chronic diseases and other illness improves health outcomes
Committed to quality and safety	Demonstrates commitment to quality improvement through the use of health IT and other tools to ensure that patients and families make informed decisions about their health.	• Use electronic health records and clinical decision support to improve medication management, treatment, and diagnosis. • Establish quality improvement goals to maximize data and reporting about patient populations and monitor outcomes	Focus on wellness and prevention reduces incidence / severity of chronic disease and illness
			Health care dollars saved from reductions in use of ER, hospital, test, procedure, & prescriptions.

quality as well as efficiency

Minister for Health, The Hon Tanya Plibersek
New Family Medicine
Parliament, Canberra Australia
19 March 2013

Australian Government

- **Australia** recognizes evidence in support of Patient-Centered Medical Homes is in, and it's compelling.

- Improved access to care;

- Improved clinical outcomes;

- Better management of chronic and complex disease;

- Decreased use of inappropriate medications;

- Decreased hospital admissions and readmissions; and

- Improved palliative care services.

- Therefore the Australian government will adopt Patient-Centered Medical Home as standard of care.

Survey Of 5 European Countries Suggests Patient-Centered Medical Homes Would Improve Family Medicine Primary Care
